Improvements

In a endeavor to improve the hunting success at Pope Lake Hunt Club, we have been working on a number of improvements. One of them is to remove the milfoil weed from the front lake. The milfoil weed is encroaching the landing area in front of the blinds where we set up our decoys. Greg Layton has been leading the work with the help of others. They have done away with most of it in front of the blinds and are working up steam to the bridge. This coming Saturday we will be having a work

party to install floors, back and top on the back lake blinds. We have also leveled the blinds. This should make it better for shooting. If time permits, we will also clean out the pit blinds and install the seat in them. We should be starting on bank repair in late August or early in September. Will keep you posted.
