

# April 2024 Newsletter

Pope Lake Hunt Club

April.. 2024  
Volume 15, Issue 4

## Spring 2024

The high water raised havoc at Pope Lake Hunt Club. Except for the flood of 1996 I have not seen water level so high at the club. Most of this was because the Oregon Department of Fish and Wildlife main big pump was not working. As per Casey the assistance manager of ODF&W They ran the little pump, but it could not keep up. Hopefully they get the big pump fixed for next season. So, we don't have a repeat of this year.

High water in 1947 at Club House

Overall, our duck and goose counts for the 2023-24 season were substantially down from past years. The reason was outlined in last month newsletter.

We have several projects ready to get underway this summer. The biggest one is to get the dike repaired on the North side of the blinds. We will be changing the crop rotation this summer as well. Stay tuned for more information on coming projects and changes.
